SECTION 13: Disposal considerations		
13.1. Waste treatment methods		
Waste treatment methods	: Recycling is preferred to disposal or incineration. Can be incinerated according to local regulations. Dispose of contents/container in accordance with licensed collector's sorting instructions. The waste code/waste name refers to the end product. To be defined by the customer in agreement with appropriate waste disposal company.	
Product/Packaging disposal recommendations	 Empty containers should be taken for local recycling, recovery or waste disposal. Contaminated packaging should be emptied as far as possible and after appropriate cleansing may be taken for reuse. Packaging that cannot be cleaned should be disposed of like the product. 	
Additional information European List of Waste (LoW, EC 2000/532)	 Flammable vapours may accumulate in the container. 07 06 04* - other organic solvents, washing liquids and mother liquors
